Secure-24 SAP Hosting helps you deliver your SAP Project on time and within budget through a very cost effective and efficient model

About Secure-24

Secure-24 (www.secure24.com) is a premier provider of information security and managed hosting; providing customized, highly available environments for customers. SAP has been a core focus for Secure-24 since our inception in 2000.

Growth

Recently Secure-24 was recognized as one of the 500 fastest growing privately held companies in the United States by the Inc.500 committee (www.inc.com). Over the past five years our annual growth has exceeded 100% every year running. Secure-24 now has a customer base exceeding 150 customers. Our customer attrition has been non-existent during this outstanding surge in growth.

Secure-24's growth is 100% organic. We grow "One customer at a time."

We are positioned to be nimble, responsive, and provide a level of partnering and service that has proven to be unapproachable by our competitors.

US-Based Company

Secure-24 employees and services are located solely in the United States. Our facilities are in Southfield, MI and Phoenix, AZ. Secure – 24 is privately held and financially healthy. We are poised for continued growth and success. Resultantly customers can look forward to working with the same quality individuals over the length of the service contract.

SAP Experience

Volker Straub, prior to co-founding Secure-24, established the core ERP/SAP R/3 hosting business for the largest SAP application hosting provider in Europe. With this background, he has assembled a strong team of Secure-24 professionals providing leading SAP services with only one goal in mind – full satisfaction of our customers.

Fantastic ROI

With a strong focus on outstanding customer service in combination with our experience and proven methodologies our customers reap the benefit of an extremely competitive value proposition. Secure -24 has made a positive effect on their bottom lines.

Future

The Secure-24 team has been providing remote support and development services to clients for years. We will be flexible in adapting to the evolving SAP environment and will review options to restructure the support team periodically with a focus on our customers needs.
