

SECURE-24 CLOUD ADVANTAGE FOR ORACLE®

Enterprise Cloud on Oracle® Private Cloud Appliance

Secure-24 Cloud Advantage for Oracle enables enterprises to leverage Oracle applications and databases on Oracle's Private Cloud Appliance (formerly Virtual Compute Appliance). Reduce application deployment from days to hours, while reducing costs and eliminating multi-vendor integration.

Accelerate Oracle Application Deployment

Secure-24 Cloud Advantage for Oracle enables businesses to leverage Oracle applications and databases on Oracle's Private Cloud Appliance (formerly Virtual Compute Appliance). Oracle Private Cloud Appliance is an engineered system that radically simplifies the way to install, deploy, and manage converged infrastructures for any Linux, Oracle Solaris, or Microsoft Windows application.

Key Features

- In-memory processing solutions and application performance tuning accelerators
- 24x7x365 support
- Optimized application or database performance
- Industry-leading SLAs

Cloud Advantage for Oracle leverages the Private Cloud Appliance infrastructure and provides rapid application deployment enabled by reduced lead times for equipment set up and server provisioning. Secure-24 uses pre-built Oracle VM templates to deploy Oracle software, reducing deployment from days to hours.

Secure-24 Cloud Advantage is optimized to support Oracle applications and databases including: Hyperion, PeopleSoft, Oracle Database 11g and 12c, and Oracle E-Business Suite.

Key Benefits

- Rapid application deployment: reduced lead times for equipment or provisioning
- Reduced licensing costs
- Reduced operational complexity
- Predictable costs

Performance, Security, and Redundancy

Cloud Advantage for Oracle offers performance advantages through in-memory processing solutions and application performance tuning accelerators enhancing real-time transaction processing. It allows clients to maintain current licensing agreements with Oracle – reducing total cost of ownership.

The service is backed by over 16 years of experience in managing mission-critical applications for enterprises worldwide, industry-leading application-level Service Level Agreements (SLAs), and by comprehensive disaster recovery RTO/RPO solutions.

Bottom line: Secure-24 Cloud Advantage for Oracle and Private Cloud Appliance are an extraordinary combination for running applications in a virtual environment. This combination enables IT experts to focus on achieving strategic business objectives and transforming IT to respond to customers' evolving needs rather than investing considerable time planning and configuring hardware infrastructures from scratch.

Performance. Innovation. Trust. Comprehensive Managed Cloud Services.
