

Secure-24 Cloud Advantage for SAP® HANA

Release the Power of Your Data in Real-Time

Secure-24 Cloud Advantage for SAP® HANA delivers real-time entry into a database platform without the cost of maintaining the infrastructure that supports it. As an SAP-certified provider of cloud and infrastructure operations, hosting operations, and HANA operations, Secure-24 provides clients of every size, in every industry with a HANA solution that offers greater speed, agility and reduced risk.

Key Features

- Highly experienced SAP consultants and Basis teams.
- Comprehensive management of SAP upgrades, implementations, maintenance and support.
- Multi-point SLAs at the SAP application level.
- Scalable solutions that grow with your business.

SAP HANA: Revolutionizing Business Operations

SAP HANA is revolutionizing business operations by streamlining transactions, analytics and data processing on a single, in-memory database so enterprises can operate at the speed of business – in real time.

SAP HANA technology has transformed how the entire information technology industry thinks about business intelligence and decision-making due to its widespread impact on hardware manufacturers, database systems, software developers, mobile device applications, reporting processes, networking and even business strategies.

Cloud Advantage for SAP HANA is Secure-24's comprehensive cloud-based delivery model for business critical applications. Our virtual or appliance-based SAP HANA solution integrates with any other product providing flexibility, agility, and rapid return on investment. Secure-24 Cloud Advantage for SAP HANA allows clients to:

- Experience an entire SAP landscape running up to 7x faster in our cloud.
- Run analytics up to 100x faster using SAP HANA by utilizing the full power of an in-memory database.
- Achieve fast and on-time implementations or migrations.
- Choose their deployment model: appliance-based or virtual.

Virtualized SAP HANA

HANA now runs in production on vSphere 5.5, the foundation of VMware's vCloud Suite. Running SAP HANA on vSphere 5.5 is the next step in the evolution to a software-defined data center. Enterprises can now transform and virtualize their entire SAP landscape—from transactional and analytic workloads—and focus on innovation and growth.

Key Benefits

- Faster-time-to-production
- Increased speed and agility
- Boost reliability with total security and depth in services from a premier services provider
- Reduced TCO with lower costs

Secure-24, VMware, and SAP are strategically aligned, supporting virtual SAP HANA deployments for production workloads running on VMware vSphere®, with best-in-class automated operations management supporting business continuity, native virtualization-aware security, and unparalleled platform reliability. Virtualized HANA allows enterprises to meet customer demands for system availability, optimal performance and flexibility.

Applications-Based HANA

For organizations with an extremely large SAP HANA footprint, an appliance-based solution from Secure-24 enables clients to quickly deploy large memory instances and enables clients with large HANA requirements to take advantage of all the depth and breadth of Secure-24 services. The Secure-24 team uses the right tool for the job and evaluates the requirements and technology fit for each client.

Why Host with Secure-24?

- Achieve faster time-to-production by eliminating the delays of purchasing and installing on-premise hardware.
- Gain greater speed and agility by running your entire SAP landscape 7x faster.
- Boost reliability with total security and depth in services from a business whose core is ERP hosting.
- Reduce TCO with lower costs by simplifying complex and expensive IT infrastructures.
- Simplify management and focus your resources on strategic business initiatives.
