

# Secure-24 Desktop as a Service

## Simplified Work Station Management Without Sacrificing the User Experience

Secure-24's Desktop as a Service (DaaS) provides flexible and simplified deployment and management of desktops for end user computing in the Cloud with all of the features and functionality of a local machine, but without high CAPEX of data security risks. Business applications are centralized, managed and secured in our world-class, highly secure data centers.

---

### Key Features

- Powerful virtual desktops with no oversubscription delivered via PCoIP.
- Fully managed desktop solution including patching and antivirus.
- Secure connection utilizing multi-factor authentication.
- Available across most common platforms: iOS, Android, Windows and MAC.

---

### Key Benefits

- Simplified deployment and management of user desktops.
- Reduced costs with lower CAPEX requirements for end user computing and reduced IT administrative costs.
- Enhanced security and control over corporate data.

### Simplified End User Computing

Today's workforce is largely dependent on desktop computers and access to corporate files, introducing two major risks: lost productivity due to technical issues and security of corporate information. Remediate those risks and save the cost of expensive laptops with Secure-24 Desktop as a Service, a managed virtual desktop solution in the cloud.

Desktop as a Service provides virtualized workspaces, delivering desktops and hosted applications from the cloud, as an integrated cloud service. Through desktop virtualization, applications are centralized, managed in our world-class data centers and delivered as a service to employees regardless of location.

Enterprises can eliminate the complexity and reduce the cost of maintaining thousands of disparate systems by leveraging Secure-24 experts to patch, maintain and support end use compute needs. All end users need, is a simple terminal and an Internet connection

### The Secure-24 Advantage

Secure-24 Desktop as a Service enables enterprises to deliver an exceptional end user experience with access to cloud-hosted virtual desktops and hosted applications from any device, anywhere.

Our 4GB, 6GB or 8 GB desktops offer no shared resources, use PCoIP for low latency and optimum performance and provide enterprise backups for all user data.

Users can access desktops and hosted applications on any device including laptops, tablets and smartphones several platforms including: iOS, Android, Windows and Mac.

## Sensitive Data Secured

Managed virtual desktops also store all sensitive data, backed up within our secure and compliant data centers, minimizing the risk of lost or stolen devices. Additionally, all end user data is backed up on Secure-24's Enterprise Storage.

Desktop as a Service delivers virtualization, power, simplicity and security – an easily managed, integrated and highly secured cloud service.

## Performance. Innovation. Trust. Comprehensive Managed Cloud Services.
