

# Expedite! For SAP on Microsoft® Azure

## Accelerated Migration to an SAP Certified Cloud Platform

More and more companies are migrating to public cloud: it's now the norm. Microsoft and SAP's joint efforts have resulted in an SAP certified public cloud infrastructure capable of handling large instances and workloads while also simplifying integration between Microsoft Office 365 and other SAP cloud solutions. Microsoft Azure is a robust, powerful, mature and reliable cloud platform and deploying SAP on Azure provides the best of both worlds: agility and scalability on a reliable platform. Moving SAP and other mission-critical applications, however, into the public cloud can seem daunting, but much of the perceived risk in the process can be mitigated by working with partners with expertise in public cloud migration and management. Expedite! for SAP on Azure is a comprehensive solution that guides SAP migrations from assessment and design to migration and ongoing optimization.

### Key Features

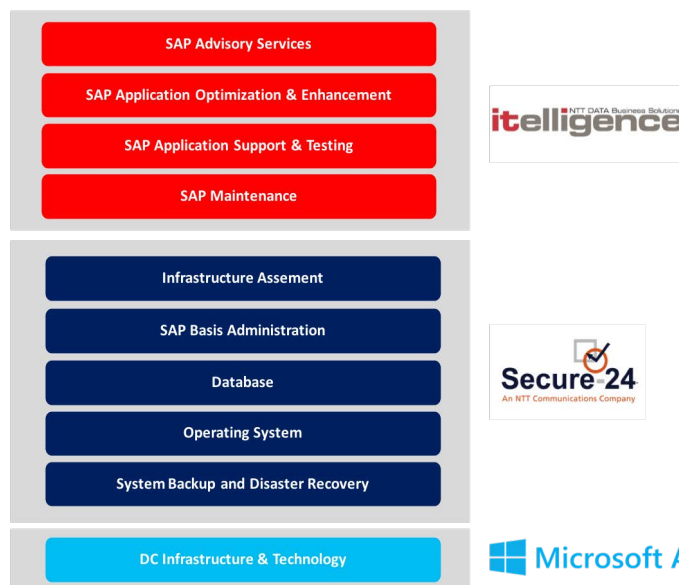

- **Predictable Costs**  
Fixed fees project and timeline.
- **Cloud Infrastructure Management**  
Network Management, OS maintenance, backup and disaster recovery design and testing.
- **Security and Compliance Controls**  
Proper controls and security measures across the entire environment, beyond built-in cloud platform compliance.
- **Cost Containment**  
Leverage Operational Analytics to manage cost and align budgets.
- **Trusted Expertise**  
Proven, experienced and expedited migration to SAP S/4HANA and Azure.
- **Customer Experience**  
Expedite time to market and business flexibility through Predictive Analytics.
- **Comprehensive, Industry-leading Support**  
Experienced Tier 1 professionals available 24/7/365.

### The Power of Partnership: Secure-24®, itelligence® and Microsoft®

Secure-24, itelligence and Microsoft have partnered to deliver a comprehensive solution to help companies with SAP landscapes in their journey to S/4HANA. This combination brings together three highly experienced partners delivering a comprehensive solution to expedite and manage SAP migrations to Azure.

The combined SAP experience, coupled with advanced conversion and migration tools, provide a unique platform for accelerating the digital transformation journey while minimizing business disruption. But, it doesn't stop there. After the migration, our professionals work with clients to optimize the applications, and access surrounding technologies such as IoT, AI, Machine Learning and Advanced Analytics, to enhance the client experience by creating business value through predictive and operational analytics. Intellectual property serves as a baseline for sizing and delivering the infrastructure and business processes, as well as to provide comprehensive management and platform and/or application support.

This powerful partnership can help to unlock the value of your SAP mission-critical environment in the cloud with the power of advanced technologies, innovation and industry expertise.

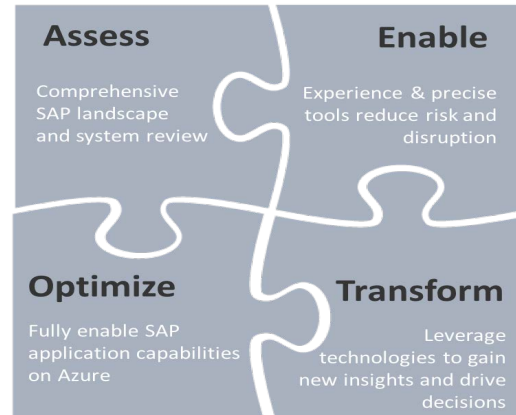

## Migration Project Lifecycle: A Managed Approach

The combination of trusted and proven experience, methodology, and advanced technologies assists clients through all phases of the cloud migration lifecycle. The process begins with an assessment, scoping and design, through cloud migration and maintenance to digital transformation.

### Key Benefits

- Identify Business Case Drivers
- Extend Your IT Team
- Minimize Business Disruption
- Accelerate Public Cloud Migration
- Leverage an Integrated Solution
- Enhance Your Security Posture

### Related Services

- Application Services
- Managed Public Cloud
- Managed Hybrid Cloud
- Managed Multi-Cloud

During the assessment phase, Secure-24 uses sDiscover, an automated tool which requires minimal time investment and quickly provides a complete view of technology footprints and system interdependencies. With this information, the Secure-24 team produces an actionable project plan and timeline.

Through additional analysis, a fixed fee project plan is developed and business case drivers are identified. Our team also works with clients to develop a transformation road map, align business process with S/4 HANA analytical capabilities, extend functionality, and to help expedite time to market.
