

CLOUD PROFESSIONAL SERVICES

Hybrid Cloud Assessment

Navigate cloud complexities and speed your digital transformation through a proven methodology for transforming people, processes, and technology

Gain clear insight into your current infrastructure and applications to create a roadmap to fit-for-purpose cloud.

Our hybrid infrastructure and application assessment of your environment provide valuable insights into your current status and a high-level roadmap to fit-for-purpose cloud.

Our Journey to the Cloud framework is designed to support you to achieve your cloud adoption goals.

How We Deliver

This assessment is conducted to review and analyze your infrastructure and applications - delivering valuable insight into the current state of your IT landscape.

We will develop a high-level design and transition roadmap for moving assets into a fit-for-purpose cloud, through:

- 1. Understanding** your business objectives. Information gathering workshops with technical and business stakeholders to help review documentation, architectural gaps, business goals and challenges.
- 2. Analyzing** your infrastructure and workloads. The information gathered is reviewed to determine if it is complete and free of any unexplainable abnormalities.

At-A-Glance

Business Outcome	Benefits
Business and technology alignment	Security, cost, and operational governance.
Quick delivery based on proven blueprint solutions	Thanks to a predefined approach and tools that provide quality and agility.
Alignment to industry-recognized cloud security controls	Gain security assurance that will enable organization to accelerate cloud security maturity.
A recommended roadmap	We deliver a read-out to share the results of the engagement, recommendations, and action plan.

3. Designing high-level infrastructure. Based on blueprinted solutions, NTT applies best practices, identifies the best execution venue and target technology to meet your business outcomes.

4. Validating that the design matches business objectives. High-level design and roadmap are reviewed and refined in successive short meetings or video calls until approved.

Valuable insight into your current infrastructure and applications to provide a clear roadmap to fit-for-purpose cloud.

Service	Key Features
Transition from any platform to any platform	<ul style="list-style-type: none"> Platforms supported include VMware, Hyper-V, Azure, AWS, GCP OCI, Nutanix and others. Technologies supported include IaaS, PaaS, Serverless and others. Containerization supported includes, but not limited to Google Kubernetes Engine (GKE), Azure Kubernetes Service (AKS), Amazon Elastic Container Service for Kubernetes (EKS), Amazon Elastic Container Service (ECS), AWS Fargate, and Docker on IaaS virtual machines.
Proven blueprints	Tried and tested blueprints based on best practices, certified products and years of experience.
Risk mitigation	We have over 15 years of expertise in platform migrations.
Top cloud partnerships	Partnership and accreditations with all major cloud vendors.
Leverage best of breed tooling	We leverage our own IP (NTT sDiscover®) combined with leading commercial tools, used by our highly qualified experts to deliver a quality and agile transition experience.
Managed Services platform	Supports the transition process and management of hybrid infrastructure globally.
Cloud Migration Services	Option for end-to-end migrations services to execute outcomes of the assessment.

Main Destinations for Our Cloud Migrations:

Our Certifications and Attestations:

ISO 27001:2013 - Information Security Management System
ISO 27017:2015 - Cloud Services
ISO 27018:2019 - Protection of Personally Identifiable Information in the Cloud
SOC 1, SOC 2 and SOC 3 - AICPA evaluations completed twice annually

Why NTT?

Global reach and local delivery
Identical delivery and methodology across regions to provide a truly consistent global service.

Full lifecycle service
Convert goals into outcomes thanks to a full IT stack from data center and network to cloud and applications.

Extensive track record
Real-world experience delivering successful business transformation projects.

Industrialized yet vendor-agnostic
Highest level of partnerships with major cloud vendors.
