

Managed Cloud Services for Oracle® Hyperion

Optimal Application Performance in a Secure Cloud

We know Hyperion. We host more Hyperion instances than any other company, so we know that performance management solutions are complex and expensive to implement, integrate, and manage. Secure-24 provides unmatched hosting and application management services for Oracle Hyperion to help organizations reduce the costs of implementing and managing Enterprise Performance Management (EPM) and Business Intelligence (BI) solutions.

Capturing Today's Value and Protecting the Future

Secure, fast and optimal enterprise applications performance is crucial to maintaining competitive advantage. Processes are becoming more integrated, yielding powerful business insight and increasing the need for reliable application hosting and managed services.

Key Features

- Rapid, scalable hosting infrastructure for optimal performance
- System administration, security and performance tuning
- 24x7x365 monitoring and alarming
- Industry-leading application SLAs
- SSAE 16 certified data centers

Secure-24 provides a comprehensive, yet flexible approach to managing the core systems functionality for business-critical applications allowing companies to focus on customer success. Our hosting and managed application services are designed to simplify and secure enterprise applications across the organization.

Oracle Hyperion Hosting in a Secure-24 Cloud

Secure-24 has the largest Hyperion implementation practice in the United States, with over 18 years of experience in implementing, hosting, upgrading, and maintaining Hyperion environments.

Our managed Hyperion hosting solution helps to simplify financial consolidation, planning, reporting, and analysis in a secure environment. Secure-24's hosted environment is managed by experienced Oracle Hyperion professionals.

Key Benefits

- High availability and performance
- Lower TCO and predictable costs
- Minimized risk and rapid ROI
- Improve Oracle Hyperion end user satisfaction

Maximize productivity and get data into the right hands faster with Secure-24 Managed Hyperion reporting solutions. Our Hyperion solution is finely tuned to run seamlessly on our managed cloud allowing up to 7x performance rates for business intelligence and reporting requirements.

Our Hyperion application teams and next-generation infrastructure provide the optimal performance necessary to stay agile in today's rapidly changing business environment. Our teams have experience in Hyperion:

- Data Warehousing
- Oracle Data Migration and Integration
- Database Managed Services
- Dashboards and Reporting

Why Secure-24?

- Largest US Hyperion hosting practice
- Oracle Gold Partner
- Managed Application Services for high availability and proactive monitoring
- SOC 1 and Type 2 Certified
- Premier Services to design, migrate, patch or upgrade Hyperion applications environments

Security, Compliance, and Control

Secure-24 designed its world-class data centers with the highest security standards and compliance. We considered the full range of security features in our design: construction standards such as concrete and steel-reinforced walls, multi-layered biometric access controls, redundancy for every component, and strict process and procedures. Regardless of the network solution designed for your implementation, your applications and data are protected over a highly secure connection that incorporates the most stringent security standards.

Regulatory Compliance

ISO/IEC 27001:2013, ISO/IEC 27017:2015 and 27018:2014 Certifications

Secure-24 has achieved the International Standards for Organizations (ISO) 27001:2013 Certification for Information Security Management System (ISMS) and Operations and the ISO/IEC 27017:2015, International Standards Certification for Cloud Services and 27018:2014 Certification for Protection of Personally Identifiable Information in the Cloud.

SOC 2 and SOC 3 Evaluations

Secure-24 has successfully completed the Service Organization Control (SOC) 2 and 3 evaluations/ SOC 2 and SOC 3 compliance confirms that we have controls in place to ensure the security, availability, processing integrity and confidentiality of managed cloud services.

Performance. Innovation. Trust. Comprehensive Managed Cloud Services.
