

Secure-24 Managed Public Cloud Services

The Power of the Cloud Delivered as a Service

Secure-24's Managed Public Cloud Services deliver the power and flexibility of the Public Cloud, while minimizing complexity, sprawl, and compliance concerns. Secure-24's multi-cloud approach allows clients to maximize the benefits of Public Cloud workloads.

Key Features

- **Simplified Deployment.** Access to geographic regions without deploying a massive intensive infrastructure.
- **Flexible Billing.** Usage-based billing with the ability to negotiate committed rates, auction-style spot instances and instantly scale up or down resources leveraging best practice containment strategies.
- **Advanced Technologies.** Access to robust toolsets within Public Cloud PaaS for IoT workloads and Big Data.
- **Comprehensive Service Level Agreements.** Stringent Service Level Agreements help to ensure optimized performance of Public Cloud environments.

"Often public cloud consumers seek solutions to offload management responsibilities to the cloud, and are surprised to find they are now spending large amounts of time managing a more complex heap of challenges." - Nick Ilitch, VP Product

Public Cloud: Designed for the Enterprise

Public Cloud has helped many organizations move workloads outside of their four walls to an environment with instant scale and access to advanced tools and controls. However, Public Cloud introduces new challenges and "lift-and-shift" does not always yield immediate results.

The scalability, flexibility, and support for advanced technologies such as: IoT, Business Intelligence and DevOps, gives Public Cloud clients access to a platform for digital growth. However, this speed and agility must also be accompanied by operational services models to keep systems secure, contained and in compliance — which many Public Cloud clients often neglect.

Secure-24's robust Managed Public Cloud Services help move clients away from complexities and towards a simplified, seamless and controlled environment. Managed Public Cloud Services deliver the performance and security benefits in a proactively managed environment, so clients can focus on their business.

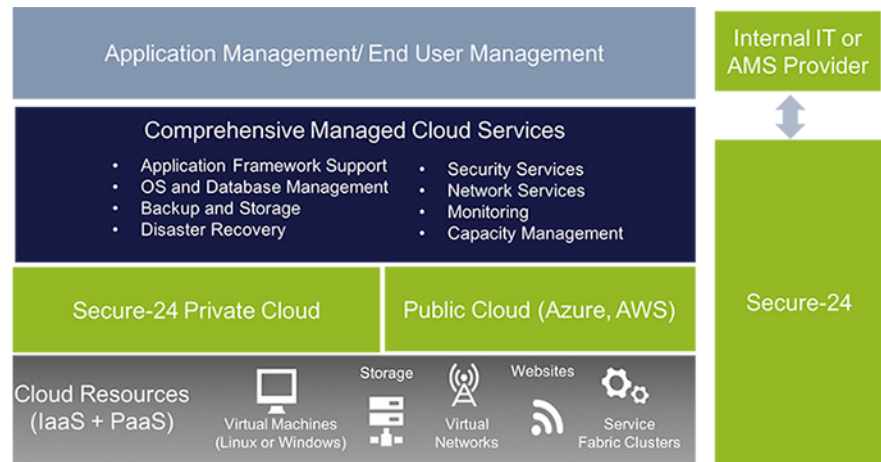

Cloud Advisory and Management Services

Secure-24 has been helping clients move and manage enterprise workloads since 2001 and provides Public Cloud Advisory and Management services for clients with global environments. Whether atop Microsoft®, Amazon®, Oracle® or Google®, Secure-24 has the expertise to deploy and manage systems on Public Cloud IaaS in addition to a Secure-24 hosted facility or on-premise. This breadth of experience uniquely positions Secure-24 to manage and support environments in the cloud model (private, public or hybrid) that best meets workload requirements.

Secure-24 provides a holistic, integrated solution to manage storage, networks and compute in a data center, cloud or on-premise deployments.

Key Benefits

- Managed Services expertise from a trusted multi-cloud advisor.
- Customized security and control.
- Best in class deployment and management services for an optimized cloud platform.
- Cost-effective, secure Public Cloud environment flexibility.

Add-On Services

- Custom Application Services
- SAP and Oracle Services
- Managed Security
- Virtual CISO Services
- Managed ITSM Platform
- Mobile Device Management

Cloud Management Services include:

- Security and compliance experts enable adherence to the most stringent standards and compliance requirements, including HIPAA, PCI, HiTech, ITAR, FISMA, Safe Harbor, SOX, IRS 1075 and many other compliance standards.
- Comprehensive multi-layered security solutions that use best-of-breed cloud-native and cloud-agnostic toolsets, including: advanced endpoint detection and response, security incident event management (SIEM) and intrusion detection and prevention systems for protection across the cloud network.
- Seamless cloud control and cost containment for the enterprise environment.

Cloud Migration Management and Containment

Secure-24's Cloud Migration Management includes streamlined workflows and migration assistance to help ensure that appropriate transparency and controls occur before application groups fully migrate to the cloud.

Secure-24 provides proactive recommendations and performance controls at a technical and business review level. Clients can realize potential savings from cost containment between 5 and 25 percent monthly, and protect IT environments from uncontrolled services sprawl in the cloud.
