

Managed Services for SAP® S/4HANA

End to End Services for Successful S/4HANA Implementations

SAP® S/4HANA is SAP's next-generation business suite, built on the modern, lightning-fast and advanced in-memory SAP HANA platform. SAP S/4HANA simplifies customer adoption, data models, user experiences (SAP Fiori®), decision-making and business processes. These complexities and differences emphasize the need for comprehensive SAP managed services. An SAP-certified SAP HANA Cloud and Hosting Partner, Secure-24 provides a solution with greater speed and agility, while reducing risk. We deliver instant entry into S/4HANA without the cost or effort of maintaining the infrastructure that supports it.

Key Features of SAP S/4HANA

- Instant business intelligence
 - Fiori across all device lines
 - Deployment options with guided configurations
 - All active data in-memory which removes data redundancy
 - Unlimited workload capacity (600 Bn scans/server/second)
 - Data sources: social, text, geographic, graphic, processing
-

Immediate. Intelligent. Integrated.

Real-time data, customer experience and total cost of ownership differentiate S/4HANA from other business suites. Built on SAP's advanced in-memory platform. This solution is a shift from a database agnostic suite to the revolutionary in-memory computing platform. SAP HANA, it is deployable in the cloud or on premise. The choice is yours.

Secure-24: Your Trusted Partner

Secure-24 provides a comprehensive, yet flexible approach to managing core system functionality for SAP business-critical applications, allowing companies to focus on core business initiatives and customer success. Our SAP HANA certification and managed application services are designed to simplify and secure enterprise applications across your organization.

Secure-24 is much more than a hosting vendor. We strategically partner with clients for success over the long-term. Our mission is to help make our clients successful by enabling them to effectively solve their most critical business challenges.

Our SAP Basis Competency Center, composed of a team with hundreds of combined years of SAP hosting experience and certifications for SAP HANA, are experts at accelerating SAP environments. Our SAP team is highly experienced in deploying, maintaining and operating Proof of Concept S/4HANA environments.

Key Benefits

- **Faster time-to-production.**
Eliminate the delays of purchasing and installing on premise hardware.
 - **Increased speed and agility.**
Run your entire SAP landscape up to 7x faster.
 - **Enhanced reliability and security.**
Customized solutions and In-depth security services.
 - **Reduce IT Spend and Lower TCO**
Simplify complex and expensive IT infrastructures.
-

An Integrated Approach to Governance, Risk and Compliance

Similar to security, maintaining compliance with legislative and other industry regulations requires both expertise and regular, advanced monitoring. Secure-24's integrated approach helps relieve much of the compliance burden for IT by aggregating and providing information for an audit quickly and accurately. Using an IT GRC to automate your business critical audit processes of measuring and managing adherence to legislative policies minimizes the impact of an audit.

A Trusted Partnership.

Faster time to production.

Our core focus is to provide comprehensive managed cloud and clinical services with zero tolerance for down time.

Single Platform.

We own our data centers and we control the entire solution stack (Data centers, infrastructure, etc.)

Certification.

SSAE16 Type II SOC 1 Certification (formerly SAS70 Type II) ensures compliance for operations and data centers

Highest Security.

Secure-24 uses the most advanced monitoring technologies and top technologists to safeguard your assets 24x7x365. We provide multiple layers of security, including dual-biometric access and aligned ITIL processes.
