

Secure-24 Mobile Device Management

Flexible and Secure Mobile Device Management Solutions

More and more organizations encourage employees to use mobile devices to perform their jobs. Whether the day-to-day focus is business management, marketing, sales, software development, or customer relationship management, mobile devices are proliferating in the enterprise at an exponential rate. Although beneficial, it comes with a hefty price — complexity and increased security risk. Secure-24 Mobile Device Management helps minimize security risk and enables flexibility with a Bring Your Own Device (BYOD) policy or company-owned devices.

Key Features

- Fully managed mobile device solution including 24x7x365 support
- Corporate and personal data separation
- AES 256 encrypted email on mobile devices
- Enforced security on all mobile devices
- Remote-wipe capabilities for lost or stolen devices

Key Benefits

- Minimize potential for data loss with Data Loss Prevention (DLP)
 - Boost employee productivity with secure BYOD
 - Meet compliance requirements and simplify audits
-

The Challenge of Enterprise Mobility

The world's leading businesses have realized that Enterprise Mobility has become crucial to business operations. With the growing number of device platforms and operating systems available, businesses are facing new and complex mobility management challenges. What is the solution for mitigating data security risks and reducing complexity: Secure-24 Mobile Device Management.

Secure Your Corporate Perimeter

The evolution of mobile computing enables employees to stay connected from anywhere in the world. With Secure-24's managed Mobile Device Management mobile workforces can focus on business while our teams help to ensure corporate data is secure and contained on mobile devices.

Mobile Device Management minimizes security risk and allows flexibility with a Bring Your Own Device (BYOD) policy, or company-owned devices. Our enterprise solution supports: Android, Apple iOS, BlackBerry, Mac OS, Symbian, Windows Mobile, Windows PC/RT and Windows platforms. So employees have flexibility and choice of mobile devices and operating systems.

Advanced Mobile Device Solutions

For enterprises seeking additional security and functionality, Secure-24 offers Advanced Mobile Application and Advanced E-mail Data Loss Prevention (DLP) packages.

Mobile E-mail DLAP Package

Customized data loss prevention enables secure corporate e-mail and attachments. The advanced e-mail package further enables enterprises enhanced security by restricting e-mail copy and paste capabilities to personal areas of mobile devices, providing the ability to proxy e-mail traffic and the security of Exchange ActiveSync and OWA traffic, while preventing whitelist or blacklist devices from accessing mail servers.

Advanced Mobile Application Package

The Advanced Mobile Application package enables enterprise to further enhance the end-user experience with corporate applications, content repository integration and the enterprise Intranet through secure authentication and encryption. Eliminate the concern of loss of corporate data through third party applications or malware attacks against IT infrastructures by selectively allowing applications access to corporate data.

Performance. Innovation. Trust. Comprehensive Managed Cloud Services.
