Flexible Deployment Options

The choice is yours. You can choose the best deployment model for your business. Secure-24 can manage your Oracle E-Business applications on premise or in one of our state-of-the-art data centers. Our Oracle application teams and next generation infrastructure provide the optimal performance necessary to stay agile in today's rapidly changing business environment.

Security, Compliance, and Control

Secure-24 designed world-class data centers with the highest security standards and compliance. We considered the full range of security features in our design: construction standards such as concrete and steel-reinforced walls, multi-layered biometric access controls, redundancy for every component, and strict process and procedures. Your applications and data are protected over a highly secure connection that incorporates the most stringent security standards.
