10 Reasons To Choose Secure-24
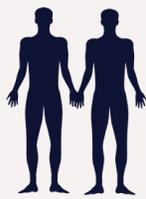

**Secure-24**
An NTT Communications Company

Managed Services for Remote Offices

01 Expertise

With 16+ years of managed services experience, Secure-24 has has the expertise and capabilities to deliver exceptional service. We are the first Private Cloud provider to Cloud-enable technology for the sole purpose of providing managed services for business critical applications that require remote office or Public Cloud hosting.

02 Advanced Technologies

Secure-24 is among the first to take a leadership position in the industry's most advanced technologies and innovation. We offer a comprehensive range of services and technologies that bolster security, strengthen compliance control, and provide detailed, transparent reporting.

03 Strategic Partnership

Secure-24 is committed to protecting your IT infrastructure and critical data. We are the ultimate "Enterprise Partner" and "Trusted Advisor", delivering the highest standards of service.
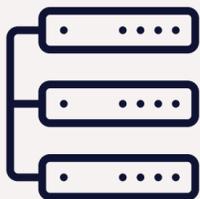

04 Superior Client Experience

Secure-24 specializes in successful outcomes. By making each client's cloud requirements work seamlessly together and providing a broad portfolio of managed services, we treat each client like our only client. Our 98% client satisfaction ratings are amongst the highest in the industry.
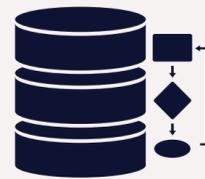

05 Reduced Complexity

Eliminating legacy architectures at the branch helps to ensure repeatable and predictable processes. Complexity is reduced through a simplified architecture.

06 Reduced Risk

Moving business-critical data that resides outside of a data center to a Secure-24 Private or Public Cloud results in greater control, visibility and reduced risk.

07 Predictable and Lower Costs

No hidden costs, with monthly service fees designed to meet your remote business needs. Decrease capital expenses and eliminate IT labor costs at the branch.

08 Increased Application Availability

Automated support and management processes eliminate human error resulting in reduced down time and optimized application performance. Secure-24 also provides guaranteed application-level Service Level Agreements (SLAs).

09 Rapid Return on Investment

Shifting resources away from IT support allows companies to allocate funds to their strategic core mission.

10 Enhanced Visibility

By collecting end user experience information from user devices, Secure-24 can "view" everything that is happening regardless of where the data is managed.
