Information Technology Outsourcing (ITO) drives business value through helping organizations focus on core competencies. By finding a technology partner, companies benefit from optimized resources, reduced total cost of ownership, and improved performance of critical applications. ITO can revolutionize an organization’s ability to refocus valuable internal resources on business challenges, because outsourcing information technology means handing the complexities and demands of managing a datacenter to certified experts.

With the latest advancements in big data and cloud computing, companies have increasingly high performance needs to remain competitive in the marketplace. Constant hardware and software refreshes can drive up internal IT costs without simplifying efforts. CIOs are looking for a capable IT partner to manage mission critical systems and bring the performance they need without the high capital investments.

Secure-24’s IT Outsourcing (ITO) solutions help industry and government react to changing business demands and concentrate their resources on innovation and business success. With our fully outsourced services, you have access to deep technical expertise with flexible and cutting-edge technologies.
The additional benefits of scalability, high performance computing and a pool of resources combine to create a measurable ROI.

Our IT Outsourcing portfolio includes applications, IT infrastructure, and management services to help achieve better business outcomes. We provide:

- Technical Consulting
- Infrastructure Outsourcing
- Application Services
- Remote Management
- Enterprise Service Management
- Full Disaster Recovery Planning
- Mobility
- 24/7 Help Desk & Support
- My Secure-24 Portal

Our services help you insure compliance, mitigate risk and optimize capabilities:

- Improve cost-effectiveness and ROI
- Align IT organization with business objectives
- Scalable and adaptable next generation infrastructure
- Improved service levels and performance
- Increase transparency, visibility and flexibility

Is Managing Your Technology Assets a Burden?

Secure-24 aims to relieve our clients of the burden in managing their computing assets. By partnering with Secure-24, you gain dedicated teams that ensure your systems are always running at top performance. CIOs can focus on strategically growing the business, without worrying about system monitoring, patches, updates and other daily maintenance issues. With Secure-24 you gain an experienced partner that utilizes a proactive approach to avoiding major incidents as well as discovering ways to improve and strengthen your technical landscape.

Technology That Works for You

Secure-24 enables companies to elevate their IT resources above ordinary day-to-day maintenance tasks so they can become extraordinary strategic business assets. By providing cost-effective technology along with expert management services, Secure-24 helps our clients meet business objectives.

At Secure-24 we stand by three guiding principles:

1. That utilizing the right technology will strategically grow a business to become more competitive – and more profitable
2. That our unwavering dedication to every client’s success is what sets us apart
3. That we provide innovation that matters for helping companies succeed

Our mission is simple: make technology an asset for our client’s businesses, not a burden.
Compliance & Certifications

Secure-24 is strongly committed to maintaining the highest level of compliance with industry and government mandates. Securing your critical infrastructure, applications and data is a primary concern.

Secure-24 is continuously audited for standards of compliance to ensure that our clients meet their regulatory and governance mandates, including:

- Sarbanes-Oxley Act (SOX)
- Payment Card Industry (PCI)
- Federal Financial Institutions Examination Council (FFIEC)
- International Traffic in Arms Regulations (ITAR)
- Gramm-Leach-Bliley Act (GLB)
- Information Technology Infrastructure Library (ITIL 3)
- Control Objectives for Information and related Technology (COBIT 4)
- SSAE 16 SOC 1 Type II (Formerly SAS 70 Type II*)
- HIPAA / HITECH

CFOs Realize Return on Investment

Most IT landscapes are large, diverse and increasingly complex. They represent a significant portion of an organization’s capital and operating expenses and can have a significant impact on bottom line profitability, revenue and top line growth. Senior management has to strike a strategic balance between reducing costs and increasing IT capabilities.

At Secure-24, we incorporate cost efficiencies and resource optimization throughout the lifecycle of your IT systems. By outsourcing your infrastructure and applications to Secure-24, companies typically cut capital expenditures and increase control by shifting to a single operational expense each month. Secure-24 has dedicated client advocates that take pride in knowing what each one of their clients’ need and then finding more ways they can leverage profitable spending strategies. Our clients benefit from:

- Reduced upfront costs, shift from Capex to Opex
- Leverage a variable pricing model, and improved speed to market
- Access to teams of skilled IT experts and ability to focus time and talent on business challenges
- Optimize IT landscape for M&A activity
- Access to leverage emerging technology
- Our solutions complement existing infrastructure
A Valued Partner

Gain the performance you need with a committed partner you can trust. We believe in helping your business succeed in the marketplace through innovative IT solutions.

From extremely complex global landscapes that contain hundreds of servers to midsize landscapes servicing a national presence, Secure-24 provides value and expertise to the continuum of business types. Secure-24 is firmly committed to helping your business gain strategic competitiveness with our IT outsourcing solutions.

Performance, security and high availability are paramount to the fulfillment of our business model. Our passion for excellence and customer success means that whether we host your SAP R/3 applications, perform data replication, or help you maintain compliance with Sarbanes Oxley, HIPAA, FFIEC, ITAR or GLB, we will work with you personally to make sure those processes operate seamlessly.

Find out how we can help your business accelerate with high performance enterprise cloud and hosting solutions.
